

Tilt-in-Space Wheelchairs WEBINAR

With Sheilagh Sherman, BA, BHScOT, MHM, OT Reg. (Ont.),
Clinical Educator, Sunrise Medical Canada Inc.

DESCRIPTION

Tilt-in-space, or dynamic tilt, wheelchairs are prescribed for a number of clinical reasons. This webinar reviews the clinical considerations in prescribing tilt-in-space wheelchairs, including how the mechanism of tilt affects outcomes for clients and caregivers. The evidence regarding the angles of tilt and/or recline required for effective off-loading, and the duration and frequency of weight-shifting required for pressure injury prevention, also will be reviewed.
